

Faithful: The Original Coloring Book

Faithful 32x Edition

Forward

Ever since the beginning, Faithful has always been about the community. From the original Minecraft Forum post in 2010 to the latest messages sent on our Discord, our team has always been working to make Faithful more accessible to the public.

Through the years, we've released comprehensive texturing guidelines, a custom-built Discord bot to handle submitted textures, and a thriving community-run add-on platform to truly mold the Faithful experience to the player. Now, we're ready to take the next step to bringing Faithful to everyone.

Introducing Faithful: The Original Coloring Book.

It's become increasingly clear over the years that the tools used to develop Faithful are hindering potential new artists. Many of the most popular drawing programs are expensive subscriptions that would put the average Faithful user in severe debt, but that ends now. Our latest innovation in democratizing the texturing process for everyone is a brand new system, which we call "drawing on paper."

Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est April Fools.

Faithful also prides itself on sus-tainability. To reduce the carbon footprint of the users among us, our book is distributed entirely online. To use the coloring features, simply print it out on your nearest printer. Or fax machine. Or printing press. We don't care; do what you want.

Given that the median Faithful voter is probably 12, we've also taken the liberty of including definitions for all of the textures. We hope that this book ushers (musicians not included) in a new age of Faithful—one which is truly for everyone (except for a specific brand of hard seltzer).

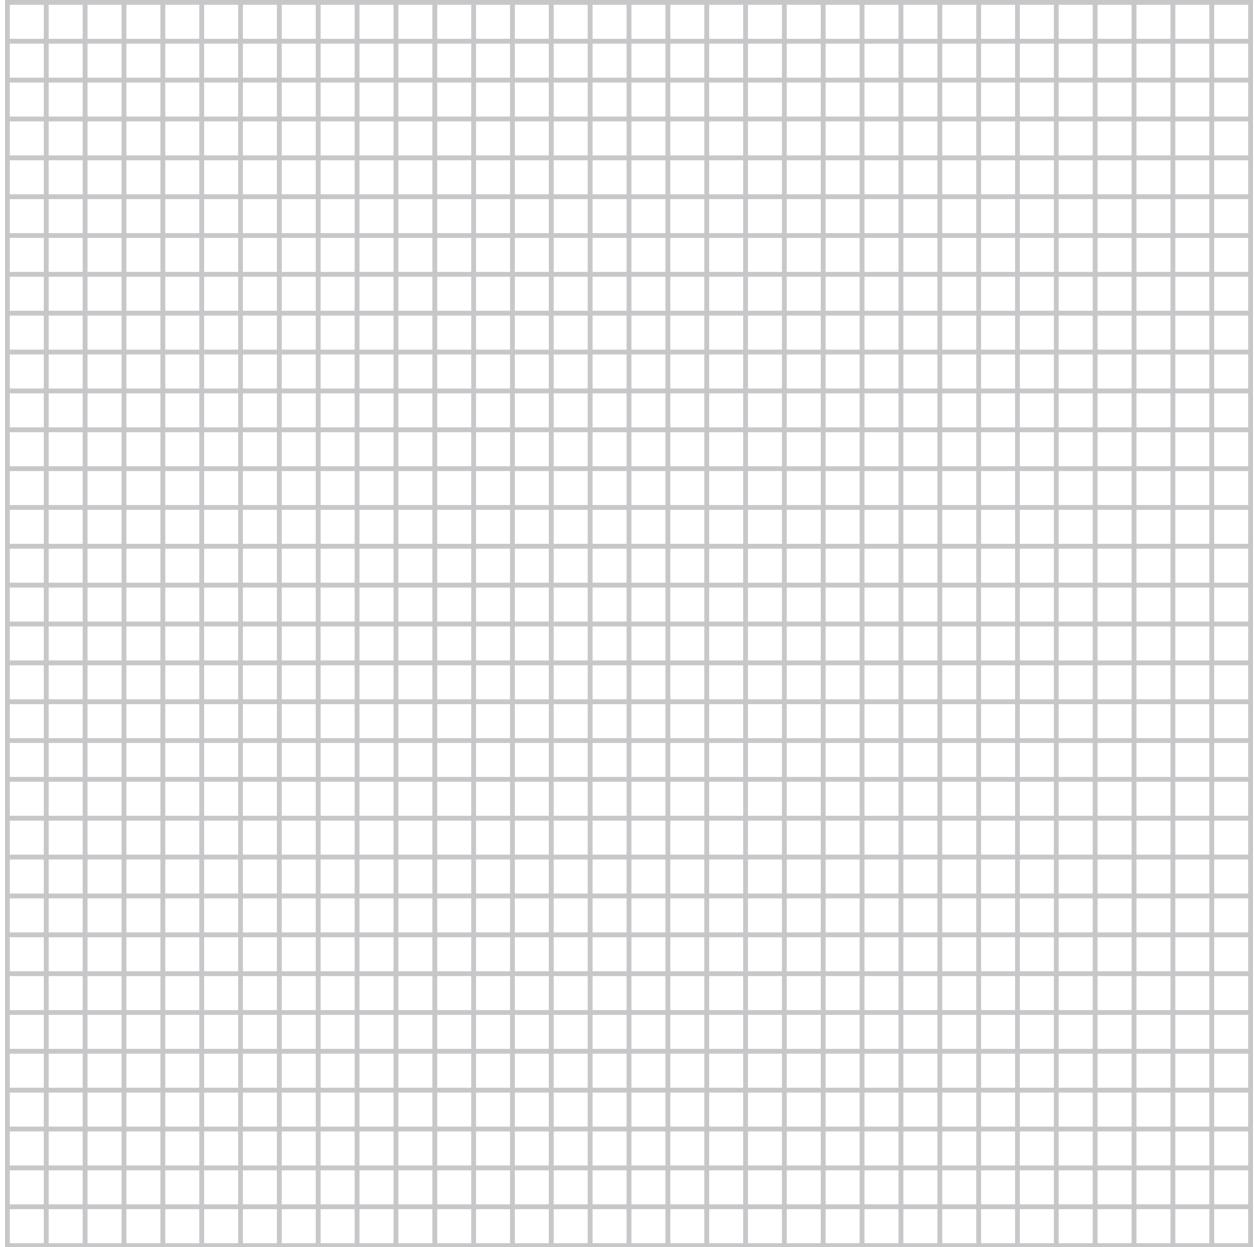

Faithful 64x version coming in 2027.
